

ECCCB

Prague 2022

ECCCB returns to Prague after 13 years!

Czech University of Life Sciences, Prague, Czech Republic

The Society for Conservation Biology – Europe Section invites you to participate in the
6th European Congress of Conservation Biology

Save the date to your calendars to participate: **August 22-26, 2022**

“Biodiversity crisis in a changing world”

The current biodiversity crisis has led to a call for transformative change globally and in Europe - a change in how we interact with nature that reduces pressure on biodiversity and secure Natures' Benefits to People. This challenges how we perform conservation science, and calls for science-based practices, which put humans and nature on a track that takes us out of the current biodiversity crisis.

Practitioners, consultants, politicians, conservation and social scientists, as well as students are welcome to discuss and design new guidelines, tools and strategies in order to meet new and reverse the loss of biodiversity.

The Congress will take place again on the peaceful green campus of the Czech University of Life Sciences Prague, in a suburb of the city only 20 minutes from the historic centre of Prague – an UNESCO World Heritage Site. Prague is a geographical heart of Europe and a place with high diversity, interesting wildlife, and a long history.

Visit our website and pre-register there to stay in touch at www.eccb2022.eu
If you have any questions, contact us at info@eccb2022.eu

Important deadlines:

Call for symposia, workshops and training courses

Call for abstracts

Early Birds registration

Jun 15 – Sept 15, 2021

Nov 1, 2021 – Jan 31, 2022

Jan 1 – March 31, 2022

Society for Conservation Biology
Europe Section
